

▶▶▶ Compact Dual-Band 1/2 Wave Antenna

The *ANT-DB1-RAF-RPSMA* is a compact, dual-band, 1/2 wave antenna covering the 2.45 and 5.8GHz bands. The antenna features a tilt and swivel joint which allows it to be oriented at straight or right angles to the product or folded for storage and shipment. It attaches to the 702-W via an RP-SMA connector

702-W APPLICATIONS

- Wireless LAN applications
- Client antennas
- 802.11b/g/n applications

*Given the following parameters:

- Free Space loss / 2-ray ground reflection models
- Antenna is mounted directly into an *N-TRON 702-W* Ethernet Radio mounted twenty-five (25) feet above ground level.
- Clear line of sight between radios with no obstructions of the first Fresnel Zone
- 20MHz wide signal
- Center frequency = 2.452GHz or 5.805GHz
- 10dB loss assumed for weather conditions

Range estimates are theoretical. Actual results may vary based on installation conditions. A site survey should be performed as part of the planning process to determine the presence of RF interference and identify optimum installation locations for access points and antennas.
