3M™ All Purpose Fast Cure Filler, 05221, 9.3 fl oz (276 mL), 6 per case

3M ID 60455084842 UPC# 00051131052215 Part Number 05221 CAT# 5221

3M™ All Purpose Fast Cure Filler helps increase productivity while ensuring body repair quality with an extra creamy, easily spreading consistency. This filler is part of our 3M™ Dynamic Mixing System (DMS), which mixes two-component products directly in the nozzle for a perfect ratio every time. DMS products boost productivity, reduce product waste and increase profits for auto body shops.

- Extra creamy formula spreads easily
- Formula cures faster in cooler temperatures
- Stain and tack-free formula increases quality and work efficiency
- Fewer pinholes delivers more professional results
- Shorter cycle times boosts productivity
- Dynamic Mixing System (DMS) reduces product waste

Overview

Professional Results with User-Friendly Convenience

Higher quality auto body repairs and easier working properties for automotive technicians make 3M™ All Purpose Fast Cure Filler a preferred choice for today's shops. Our filler offers the advantages of being both stain and tack-free. The creamy consistency of our filler smooths with less effort and produces fewer pinholes. With the built-in efficiencies of this filler, it's possible to achieve shorter cycle times to complete automotive body repairs in less time.

Achieve Better Results with the 3M Dynamic Mixing System

3M™ All Purpose Fast Cure Filler is part of our 3M™ Dynamic Mixing System, which boosts efficiency by mixing two-component products in a nozzle that dispenses perfect ratios of filler directly to the workspace. With the Dynamic Mixing System, you only mix and apply the amount of filler needed to complete the task, which reduces product waste by eliminating guesswork on how much to mix. Unused filler remains safely stored within the cartridges. Due to the sealed environment of the Dynamic Mixing Nozzle, no air infiltrates while filler is being mixed, keeping pinholes to a minimum.

Formulated for Cooler Temperatures

This filler, formerly sold as 3M™ Dent Filling Compound - Cool Weather - 55, offers faster curing properties in cooler temperatures, which can have the effect of slowing the process. Faster curing in cooler temperatures will help keep productivity up in cooler seasons and for projects left overnight to dry. We formulated this filler so that it can be used in temperatures as low as 55°F and be ready for sanding in approximately 15 minutes.
